

BOOK

Research Work Inclusion

in the

[SPIE Milestone Series in Laser Diagnostics](#)

edited by

Ronald J. Adrian and Brian J. Thompson

(ISBN: 9780819412973, Vol. MS78, August 1, 1993)

In the preface of this book, in which Dr. Chehroudi's work was selectively published, one reads:

"Papers in this collection were selected for their importance to the field of laser Doppler velocimetry. They fall into three categories:

- papers that pioneered new ideas or presented an important achievement for the first time;
- papers that were the culmination of many foregoing efforts or that elucidated an important topic with special clarity and thoroughness; and
- papers that described a particularly elegant or important application of the technique.

To qualify as a milestone, a paper must pass a test of time,.... "
